

A.P. Moller Capital is pleased to announce that it has strengthened its strategic commitment to Morocco with the hiring of additional local representatives to lead investment efforts in the country

Copenhagen, Denmark, January 24, 2024 - A.P. Moller Capital is an infrastructure fund manager focused on growth markets which benefit from macroeconomic tailwinds driven by demographics, nearshoring trends, trade patterns and the green transition. These prevailing themes are a reason for why the company continues to see Morocco as an attractive source for new investments.

Owned by A.P. Moller Holding, and part of the A.P. Moller Group, A.P. Moller Capital will continue to draw on its network and experience to accelerate its investment making capabilities through opportunities in warehousing, cold storage, ports, airport operations, energy efficiency and green fuels, amongst others. The company has already invested in grain terminals and energy transition projects going back to 2020. The A.P. Moller Group can trace its presence back to the JAKOB MÆRSK which first called in Morocco in 1925, and has helped to create Tangier as one of the most important transfer points of global trade via its container terminals.

Our growing team of local representatives, including the recent hire of Ghislane Guedira, will be supported by the broader A.P. Moller Capital team. Ghislane will lead efforts in Morocco and manage the boots on the ground presence. Ghislane brings a wealth of experience, having been responsible for some of the most high-profile international financing programs in the country. She has held many prominent roles during her over 30-year tenure and has a successful track record in financial structuring.

Kim Fejfer, Partner, said “We are delighted to continue strengthening our representation in Morocco through the onboarding of additional local partners and look forward to working closely with Ghislane.” Ghislane joins a growing team of representatives and advisors based in the region. “Together we will work to source and execute new opportunities that allow us to continue “doing well while doing good” by advancing our contributions to the local economy in Morocco via job creation and GDP growth”.

About A.P. Moller Capital

A.P. Moller Capital is an infrastructure fund manager focused on critical infrastructure investments within transportation and energy transition. A part of the A.P. Moller Group, A.P. Moller Capital makes investments aimed at tackling food poverty, supply chain disruptions and global warming i.e., the need to decarbonize hard-to-abate sectors. A.P. Moller Capital is supported in its efforts by Danish and international institutional investors.
